#### 2023 HARVEST

Harvest began on August 3, marking one of the earliest harvests we've ever had. The extreme drought, caused by a lack of rainfall in the spring and throughout the entire vegetative cycle—yielding only about 300 liters, led to a decrease in grape production. The vines suffered from the lack of moisture, and while the clusters remained healthy, they were smaller in size. The climate continually tests us, presenting numerous challenges. Effective water and soil management are essential for achieving the best clusters and producing the finest wines. The more clay-rich soils suffered the most, while the sandier soils allowed for higher yields. On average, production across our four estates was only 50% of a normal harvest. Despite these circumstances, the wines from this vintage are authentic and balanced, a true reflection of our terroirs.

#### VINIFICATION

We chose the best vines of each variety of our terroir to produce this wine. After selecting the grapes is a manual harvest in small boxes. Fermentation and maceration with the skins for 12 days at 22°C, with two daily pumping. Aged in third and fourth year French oak barrels for 9 months.

#### TASTING NOTE

Red-ruby color with garnet tones. A young wine that offers aromas of genuine own varieties. Fresh aromas of blackberries, strawberry and a bit floral. The palate is mineral, sweet and very seductive. Balanced acidity that gives freshness and length, sweet tannins with a medium balanced.
